12 October 2022

Dear Dr Rawcliffe

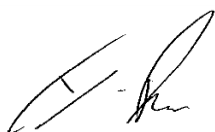

National GP Patient Survey Results 2022

At the September Primary Care Operational Group, members reviewed the GP patient survey results for 2022.

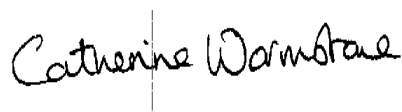

The Group would like to congratulate you on the results from your GP patient survey for 2022. Your results were consistently higher than the National and West Yorkshire average.

Your continued efforts to provide high quality services to your patients are much appreciated and acknowledged. We hope you will take the opportunity to share your GP patient survey results with your Patient Participation Group and to share how you have achieved these results with your Primary Care Network.

Yours sincerely

Dr Ibrar Ali
Independent Medical Advisor

Catherine Wormstone
Director of Primary Care
